

Miley Cyrus's Engagement Ring: Diamond, Design, Carat, Price & Story

Miley Cyrus's engagement ring has quickly become one of the most distinctive celebrity engagement rings of the current era. Unlike a traditional vertical solitaire, her new ring features a cushion-cut diamond set horizontally across a substantial yellow-gold band, giving it a bold and contemporary appearance.

The ring was given to Cyrus by **Maxx Morando**, her longtime partner and now fiancé. The couple publicly confirmed their engagement in December 2025 after Cyrus appeared at the *Avatar: Fire and Ash* premiere in Los Angeles wearing the striking diamond ring on her left hand.

What makes Miley's ring especially interesting is its combination of old and new. The cushion shape has a romantic, vintage character, while the **east-west orientation, bezel-style setting, and chunky gold band** give the ring a much more modern personality. Vogue described the design as vintage-inspired while still incorporating contemporary details.

In this guide, we will look at everything currently known about **Miley Cyrus's engagement ring**, including its designer, diamond shape, estimated carat weight, setting, metal, estimated value, proposal story, and how it compares with other celebrity engagement rings.

Miley Cyrus Engagement Ring at a Glance

Feature		Details
Owner		Miley Cyrus
Fiancé		Maxx Morando
Engagement Confirmed		December 2025
Designer		Jacquie Aiche
Center Stone		Diamond
Diamond Shape		Elongated Cushion Cut

The diamond's exact specifications and purchase price have not been publicly confirmed. Jewelry experts have estimated the stone at roughly **4 to 5 carats**, while reported value estimates have reached approximately **\$300,000 to \$450,000**.

When Did Miley Cyrus Get Engaged?

Miley Cyrus and Maxx Morando confirmed their engagement on **December 1, 2025**, when they appeared together at the Los Angeles premiere of *Avatar: Fire and Ash*.

Cyrus wore a dramatic black Gucci gown with silver jewelry, but the diamond ring on her left hand quickly became the focus of attention.

Although the couple did not make a traditional formal engagement announcement at the premiere, the ring and their appearance together made the news clear. Sources subsequently confirmed the engagement, and Morando's father also shared a celebratory post featuring the couple.

Interestingly, eagle-eyed fans had already noticed the ring in photographs from November 2025, before the couple appeared together at the premiere.

Who Is Miley Cyrus's Fiancé?

Miley Cyrus's fiancé is **Maxx Morando**, a musician and drummer.

Cyrus and Morando have been romantically linked since 2021 after meeting on a blind date. Their relationship has remained relatively private compared with many celebrity relationships.

Morando is a drummer for the rock band Liily and has also worked as a songwriter and producer. He and Cyrus have collaborated creatively, including work connected to Cyrus's music.

Their shared interest in music and creativity has become an important part of their relationship story.

Who Designed Miley Cyrus's Engagement Ring?

Miley Cyrus's current engagement ring was designed by **Jacquie Aiche**.

The Los Angeles-based jewelry designer created the ring as a **bespoke piece for Cyrus and Morando**. The design is closely associated with Aiche's preference for substantial, expressive jewelry rather than conventional engagement-ring proportions.

The choice makes sense for Cyrus, whose personal style frequently combines romantic, rock-inspired, vintage, and unconventional fashion.

What Does Miley Cyrus's Engagement Ring Look Like?

Miley's ring has a distinctive silhouette.

At the center is a **cushion-cut diamond positioned horizontally across the finger**. Rather than being mounted vertically like a conventional oval or cushion solitaire, the elongated side of the stone runs parallel to the band.

The diamond is surrounded by a bezel-style setting and sits within a **thick 14K yellow-gold band**.

The result is a ring that looks substantial without relying on a traditional halo or a large cluster of accent stones.

The Cushion-Cut Diamond

The cushion cut is particularly interesting because it combines a square or rectangular outline with softened corners.

This gives the diamond a romantic appearance while allowing it to work with both vintage and contemporary jewelry styles.

In Miley's ring, the cushion shape appears more elongated than a traditional square cushion. Experts have described the stone as an **elongated cushion** or modified cushion.

That elongated shape is important because it makes the stone particularly well suited to an east-west setting.

Is Miley Cyrus's Ring East-West?

Yes.

The diamond is positioned in an **east-west orientation**, meaning its longest dimension runs horizontally rather than vertically along the finger.

This is one of the most recognizable characteristics of Miley's ring.

East-west settings have become increasingly popular among celebrities and modern engagement-ring buyers because they provide a different look from the traditional vertical diamond orientation. Vogue specifically identified Miley's ring as part of the recent return of this style.

The design also has historical connections to Art Deco jewelry, when geometric horizontal arrangements became popular.

What Is a Bezel Setting?

A bezel setting surrounds the edge of a gemstone with metal rather than holding it primarily with individual prongs.

For Miley's ring, the bezel-style construction helps give the diamond a clean, integrated appearance.

It also works particularly well with the thick gold band because the setting and band visually read as one substantial piece rather than as a separate gemstone sitting on top of a thin shank.

This contributes to the ring's **sculptural appearance**.

How Many Carats Is Miley Cyrus's Engagement Ring?

The exact diamond weight has not been publicly confirmed.

However, jewelry experts have estimated that the stone is approximately **4 to 5 carats**. Blue Nile's vice president of merchandising, Daniela Tarantino, gave an estimate in that range, and another jewelry expert cited by Us Weekly agreed with the approximate size.

Vogue similarly estimated the stone at around four to five carats based on its appearance.

Because there is no publicly confirmed grading report giving the exact carat weight, **4 to 5 carats should be treated as an estimate**.

What Color Is Miley Cyrus's Engagement Ring?

The ring features **14K yellow gold**.

The warm gold tone is one of its most noticeable visual characteristics.

Instead of using platinum or white gold to make the diamond appear as bright as possible, the yellow-gold band creates a warmer contrast around the stone.

The choice also contributes to the ring's vintage-inspired character while keeping the overall design contemporary.

How Much Is Miley Cyrus's Engagement Ring Worth?

The exact purchase price has not been publicly disclosed.

However, jewelry experts have estimated the ring's value at approximately **\$300,000 to \$450,000** based largely on the estimated size and appearance of the diamond.

It is important to distinguish between an expert estimate and a confirmed price.

The actual value of a diamond depends on several factors, including:

- Exact carat weight
- Color
- Clarity
- Cut quality
- Proportions
- Certification
- Diamond origin
- Metal and craftsmanship
- Custom-design costs

Without an independent grading report and confirmed purchase information, the reported \$300,000-\$450,000 range should be treated as an **estimate rather than an established value**.

Why Is Miley Cyrus's Engagement Ring So Unique?

The ring stands out because almost every major design element moves away from the traditional engagement-ring formula.

Instead of a thin band and vertically positioned diamond, Miley's ring combines:

A substantial gold band + an elongated cushion diamond + an east-west orientation + bezel setting.

That combination creates a ring that feels more like a piece of sculptural fine jewelry than a conventional solitaire.

The design also fits Cyrus's personal style. Her fashion choices have frequently moved between glamorous, romantic, gothic, vintage, and rock-inspired aesthetics.

The ring manages to combine those influences without becoming overly complicated.

Why Did Maxx Morando Choose This Style?

The exact design conversation between Cyrus and Morando has not been publicly detailed.

However, the ring's unusual proportions make it feel highly personal rather than generic.

Cyrus has a distinctive fashion identity, and the ring's chunky gold construction and unconventional horizontal diamond orientation complement that aesthetic.

The designer's representative also described the broader move toward substantial gold designs as a shift toward individuality and expressive jewelry.

How Did Maxx Morando Propose?

Cyrus later revealed that Morando proposed during a **trip to Asia**.

During a December 2025 appearance on *Good Morning America*, she explained that she had never previously visited Japan because she wanted to save it as a special place for herself. She said she was genuinely surprised by the proposal and praised Morando's choice of ring.

The proposal therefore has an interesting connection to travel and personal memories, rather than being a highly publicized celebrity spectacle.

Miley Cyrus's Engagement Ring and Her Personal Style

Miley's ring is unusually well matched to her fashion identity.

She has never consistently followed one jewelry aesthetic. Her looks can move from delicate and romantic to bold and unconventional.

- The new ring reflects that flexibility.
- The **yellow gold** provides warmth.
- The **cushion diamond** gives it a classic foundation.
- The **east-west orientation** makes it unconventional.
- The **chunky band** gives it a modern, almost architectural appearance.
- Together, these details create a ring that feels recognizable without being overly traditional.

Is Miley Cyrus's Engagement Ring Vintage?

The ring is **vintage-inspired rather than genuinely vintage**.

The cushion shape and yellow gold create an old-world feeling, while the east-west bezel setting and chunky band make the overall design distinctly modern.

Vogue described the piece as vintage-inspired, romantic, and elegant while emphasizing its contemporary details.

This distinction matters because a vintage-inspired ring is newly made but borrows visual characteristics from earlier jewelry eras.

Miley Cyrus Engagement Ring vs. Other Celebrity Rings

Miley's current ring fits into a growing group of celebrity engagement rings that favor unusual proportions, yellow gold, and nontraditional settings.

Celebrity	Center Stone	Ring Style	Signature Feature
-----------	--------------	------------	-------------------

Miley Cyrus	Cushion Diamond	East-West Bezel	Chunky 14K yellow gold band
<u>Dua Lipa</u>	Round Diamond	Contemporary	Thick yellow-gold band
<u>Zendaya</u>	Cushion Diamond	East-West	Horizontal setting
<u>Selena Gomez</u>	Marquise Diamond	East-West	Horizontal marquise
<u>Ariana Grande</u>	Oval Diamond + Pearl	Two-Stone	Angled diamond
<u>Taylor Swift</u>	Old Mine Diamond	Vintage-Inspired	Yellow gold and engraving
<u>Hailey Bieber</u>	Oval Diamond	Solitaire	Large oval center stone
<u>Hailee Steinfeld</u>	Oval Diamond	Solitaire	Large oval center stone
<u>Blake Lively</u>	Oval Diamond	Pavé Solitaire	Rose gold
<u>Lily Collins</u>	Rose-Cut Diamond	Bezel Solitaire	Vintage-inspired design

Is Miley Cyrus's Ring a Good Engagement-Ring Style?

For someone who wants a conventional engagement ring, Miley's design may feel unconventional.

For someone who wants a statement piece, however, it offers several appealing features.

The east-west setting creates a distinctive appearance, while the thick gold band makes the ring feel substantial.

The bezel setting can also provide a smooth, streamlined look without the visual complexity of multiple prongs.

How to Get a Miley Cyrus-Inspired Engagement Ring

You do not need a 4- or 5-carat diamond to recreate Miley's look.

The most important design elements are the **orientation, metal, band width, and setting**.

Look for:

- Elongated cushion-cut diamond
- East-west orientation
- Bezel setting
- Yellow-gold band
- Chunky or wide band
- Minimal accent stones

A smaller diamond can still create the same general silhouette.

For a lower-cost option, a lab-grown diamond or alternative gemstone can also recreate the visual character while reducing the overall price.

Conclusion

Miley Cyrus's current engagement ring is distinctive because it combines an **elongated cushion-cut diamond, east-west bezel setting, and chunky 14K yellow-gold band**. Custom-designed by Jacquie Aiche for Cyrus and Maxx Morando, the ring blends vintage-inspired elements with a bold contemporary silhouette.

The diamond is estimated at around **4 to 5 carats**, while published value estimates reach roughly **\$300,000 to \$450,000**. Because the exact diamond specifications and purchase price have not been publicly confirmed, those figures should be treated as estimates.

Most importantly, this is **Miley Cyrus's current engagement ring from Maxx Morando**, not the ring from her earlier engagement to Liam Hemsworth.
